RECLINABLE BRACKETS FOR UNIVERSAL PANELS

Thanks to their universal fastening system, UNIFIX S mounting bracket adapts to all signal masts. Simply, slide your flanges with the M8 or M10 screws onto the rear rail and then tighten.

UNIFIX S offers the possibility to choose the inclination. The tilting system enables you to optimize the electrical production according to the area and the period of use.

With its Easy Install system and their light aluminium structure, its mounting can easily be done alone, without extra assistance.

Light, innovative
Tilting multi-position system to optimize your electrical performances

Easy installation system
Its upper cap relieves the weight of the installation so that their mounting can easily be done alone, without extra assistance. This cap can be removed afterwards for a fixation on the middle of the mast. It is used on pole with a maximum of 130mm diameter. For UNIFIX 100S /150S /200S.
